

IVY

Green and Variegated

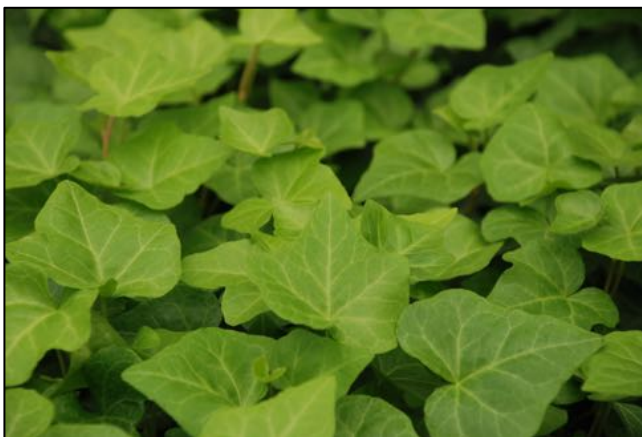

Topiary, 3" Plant Type, Cell Pack Plant

Ivies are one of the most recognized plants by consumers because of their color and many uses in the home, patio, and landscape. While there are dozens of varieties of Ivy to choose from, we have selected varieties and colors of Ivy that have small to medium size leaves, are disease resistant, selfbranching, thrive in the same growing environment and can be used in interior and exterior areas. Ivies that are cutbacks are an excellent choice for supermarkets and "high-end" garden centers. Uncut Ivies work well for high-volume, price sensitive buyers. Growers may bump into larger containers, make topiaries, or sell as landscape and patio plants.
